Threat Intelligence Report

AI-Powered Network Security Monitoring and Analytics

Generated	05-Sep-2026 08:44 PM
Total Records	11
Threats Detected	11
Benign Records	0
AI Confidence	99.88%

1. Security Intelligence Summary

Metric	Value
Total Records	11
Total Threats	11
Benign Records	0
Threat Percentage	100.00%
Benign Percentage	0.00%
Average AI Confidence	99.88%
Security Alerts	0
Security Incidents	1
PCAP Analyses	1

2. Threat and Attack Intelligence

Attack Type	Count
Unknown	11

Dataset Distribution

Dataset	Records
CIC	11

3. Alert Intelligence

Severity	Count
No alerts	0

4. Incident Intelligence

Status	Count
Open	1

5. Network and PCAP Intelligence

Network Metric	Value
PCAP Analyses	1
Total Packets	10,654
Total Bytes	8,755,237
TCP Packets	184
UDP Packets	9,534
ICMP Packets	0

Protocol Distribution

Protocol	Packets
OTHER	936
UDP	9,534
TCP	184

6. Top Source IP Addresses

Source IP	Packet Count
172.217.140.137	4,900
10.3.104.194	1,510
10.3.68.185	123
10.3.95.23	109
10.3.102.208	107
10.3.112.192	78
10.3.102.75	70
10.3.98.223	68
10.3.9.67	64
10.3.102.216	60

7. Top Destination IP Addresses

Destination IP	Packet Count
10.3.104.194	5,029
239.255.255.250	1,928
224.0.0.251	1,737
172.217.140.137	1,369
10.3.127.255	252
255.255.255.255	120
224.0.0.252	68
142.251.151.4	42
10.3.102.75	33
104.18.32.47	30

8. Security Recommendations

1. Investigate detected threat records and review their associated network activity.
2. Review source and destination IP addresses associated with detected threats.
3. Monitor open and investigating incidents until they are resolved.
4. Use Wireshark PCAP analysis to investigate suspicious network traffic and communication patterns.
5. Continue continuous network monitoring and periodically review threat intelligence reports.
